*Trail of Souls: Samsara Lyrics*

## **“Crash and Burn”**

I'm not afraid of flying blind  
It's a long stretch of road I know  
Lights up ahead are flashing  
And it's too late to turn back now

Don't want to lose it all  
No I don't want to lose it all  
Twisting and turning the inside out  
I know that it's time

Hey you, I won't stop believing  
Hey you, not gonna fall for a crash and burn

Can't contemplate when my hands are tied  
It's like rowing across the sand  
Signs up ahead are slowing  
And I don't even give a damn

Don't want to lose it all  
No I don't want to lose it all  
Twisting and turning the inside out  
I know we've crossed the line

When I crawl out, people stand up and shout  
Let's go, just go... I'm right behind you

Hey you, I won't stop believing  
Hey you, not gonna fall for a crash and burn  
Crash and burn  
And burn

## **“Forever”**

Sign up and shout at the enemy  
This looking glass is not reality  
Could it be it's something we conspired

I believe we're the only ones  
Who cry and sleep forever  
This current state is an atrocity  
Whatever happened to diplomacy  
Is it something that can be undone  
Watch close as it slowly starts to fade away  
Fade away

We've come this far  
Now we're the end of the line  
Tonight we ride  
Now I get a familiar feeling  
Now I get a familiar feeling  
Another chance to survive

The tyrant brings the war  
And we'll survive the tyranny  
It's the thing I'm counting on the most  
Watch close as it slowly starts to fade away  
Fade away

I can see they're the only ones  
Who cry and sleep forever  
Forever  
Forever  
Forever  
Forever  
Forever  
Forever

We're not allowed to fall again  
We're not allowed to love  
We're not allowed to say the things  
The things we're dreaming of

We've come this far

Now we're the end of the line  
Tonight we rise  
Now I get a familiar feeling  
Now I get a familiar feeling  
Another chance to survive

We're not allowed to love again  
We're not allowed to fall again  
We're not allowed to love again  
We're not allowed to fall again

## **“Mystified”**

Fear locks me away  
Every time I get near  
Always brings me back  
When I reach my high  
It always gets me by  
When I soar above the clouds  
I'm mystified

Wheels  
Spinning round  
Spinning and shaking  
Always leaves the ground  
When I get too high  
I look into my mind  
When I get too low I'm paralyzed

Find my way  
Through the cold darken ruins  
I'll walk and rise again  
All by myself  
Changes too cold  
Changes too bold  
Hold on so tight when the wind comes and takes me away  
Wash me away  
Rain pours down on me

Same  
Sign appears  
Spinning and turning  
Always grinding gears  
When I say goodbye I look into my mind  
When I get too low I'm paralyzed

Mystified wheels keep turning  
Paranoid cities burning

When I reach my high I always will get by  
When I soar above the clouds  
I'm mystified

Seasons too cold  
Changes too old  
Hold on so tight while the waves come and wash me

Wash me away  
Rain falls down on me

## **“Another Way to Heaven”**

We see the edge  
Floating down  
Empty space  
Empty space

Have we gone through time  
Facing fears with lonely masks  
Start to unwind  
Start to unwind

Sail on  
To a world we're not from  
We'll find another way  
To make it happen

Can we reach the stars  
And find out who we are  
And find another way to heaven

This world's not worth understanding  
This pain is never ending  
I've seen it all before

How's it so complicated  
Boring and overrated  
Hold on  
Hold on

Then sail on  
To a world we're not from  
We'll find another way  
To make it happen

Can we reach the stars  
And find out who we are  
And find another way to heaven

Move on  
Move on  
And hold the line

Hold the line

Manic moments  
Brace to fall  
Evil monsters inside us all  
Looking to get out

Mind ablaze  
With frantic thoughts  
Too afraid to let it out  
Too afraid to let it go  
Hold on

And sail on to a world  
We're not from  
And find another way to heaven

Sail on to a world  
We're not from  
And find another way to make it heaven

Can we reach the stars  
And find out who we are  
And find another way  
Find another way to heaven

Into this world  
I brought a terrible magic  
Born of fear  
He opens my eyes  
With a terrible cry

Some laugh  
Some cry  
I remain silent now  
I have become death  
The destroyer of worlds

In the radiance of a thousand suns  
Burst in the sky  
Revealing the splendor  
Of the mighty one

## **“Narcissus”**

The caustic blast  
Death embraced  
I look upon the fields laid waste  
A wry smile from deep inside  
Just one word  
I can stop the tide

Tyrant murderer  
Abide me  
Jester’s fools  
Obey me

My blind legion led to crusade  
Strike my foes with a slack blade  
No kill is clean  
Relish the torment  
Sadistic monster  
I ravage dissent

Hold steadfast  
Follow me  
Diminish yourself  
Worship me

I am beautiful  
I am perfect  
You are nothing  
The world is mine

You, you, you  
You will praise me  
You, you, you  
You will love me  
I am Narcissus

Hang on my words or be cut down  
Obedience given social breakdown  
Freedom earned in blood is vanquished

Willing enslavement  
Readily slaughtered

Malevolent god  
Adore me  
Mindless warriors  
Defend me

I am beautiful  
I am perfect  
You are nothing  
The world is mine

You, you, you  
You will praise me  
You, you, you  
You will love me  
I am Narcissus

I have no shame I can't be wrong  
You alone deny the song  
You are dim if you don't agree  
Even god wished he were me

You, you, you  
You will praise me  
You, you, you  
You will love me

And you, you, you  
You will praise me  
And you, you, you  
You will love me

## **“Trail of Souls”**

I wrote this song so you can hate it  
In your mind you're overrated  
Haunted by a past you can't deny  
Blinded by the stars in your eyes

HEY  
HEY

No one hates you, no one's mad  
Your desperation is so sad  
Haunted by a past you can't deny  
Blinded by the stars in your eyes

See the trail of souls you've left behind  
Frozen fears of past still haunt you  
Blinded by the stars in your eyes

HEY  
HEY

Passive aggressive to the end  
Imaginations in your head

Haunted by a past you can't deny  
Blinded by the stars in your eyes  
See the trail of souls you've left behind  
Blinded by the stars in your eyes

See the trail of souls you've left behind  
Frozen fears of past still haunt you  
Blinded by the stars in your eyes

HEY

## **"It's Not Enough"**

What you say, I don't hear  
Heard it too many times over again  
Don't know when, you'll believe  
What you're saying doesn't make any sense  
Blue eyes, red skies, something over my head

I can't stop thinking  
It's not enough  
It's not enough  
I won't stop saying  
Starting all over again

Run away, live in fear  
Only fools will stay around for the show  
Don't know why you can't see  
It's the strangest show that you'll never know  
True lies, neckties  
It's all come to an end

I can't stop thinking  
It's not enough  
It's not enough  
I won't stop saying  
It started all over again

In your dreams you'll find who you are  
Listen, listen, listen  
From afar  
As you fall you're free

I can't stop thinking  
It's not enough  
It's not enough  
I won't stop saying  
It started all over again

I can't stop thinking  
It's not enough  
It's not enough  
I won't stop saying
